

Overview

The safe, secure and worry-free replacement for standard shoe laces makes it ideal for high security inmate and psychiatric hospitals. The patented technology sets incrementally spaced knots along a strong rubber core. When stretched the knots reduce for adjustment at the eyelet, then systematically reemerge to form a snug knot, and thereby lace the shoe. The strong rubber core keeps the knot tied, allowing the shoe to be securely fastened.

Description: 5" Rubber Laces

Attributes

Color	Black, White
Packed	50 Pair / Cs
Product Unit Type	Case
